

Declaration

Declare a variable

```
int nrStudents;
```

.. basically means, we want a variable of type int and we will call it nrStudents.

Declare a variable

```
int nrStudents;
```

int - only integer values are allowed. Type specifies the properties.

Declare a variable

```
int nrStudents;
```

nrStudents - the name we want. nrStudent is sometimes called an identifier.

Declaration

“a declaration specifies properties of” a variable

[https://en.wikipedia.org/wiki/Declaration_\(computer_programming\)](https://en.wikipedia.org/wiki/Declaration_(computer_programming))

Declaration

Only variables?

More to come :)
