

Solutions for declaration

Declaration

1.

```
int nrStudent
```

2.

If it would be possible to declare two variables, which is not possible in the languages known by the authors of these lectures, it is hard to come up with a reasonable interpretation of what it means to use one of the two variables. This is the reason why it is not allowed to use the same variable name twice. At least for now...

So the meaning of this would be ... well, hard to come up with.
