

Meeting of course representatives for EDA093/DIT401 - Operating Systems

Date: 2020-09-30

Participants:

Vincenzo Gulisano (course responsible)
Johannes Binde
Stig Arne Knoph
Elias Persson
Jacob Thorselius Pedersen

Minutes:

Issue with the sound quality in some lecture videos. Vincenzo will look at if something can be done with sound editing software to fix it.

Clarify what functionality does not need to be implemented in Lab 1. For example, running arbitrary commands with pipes in the background.

Discussion about keeping the current lecture format, with pre-recorded videos, for future instances of the course. Positive response from students to this idea.

Vincenzo would really like feedback during the course evaluation this year, given the special circumstances.
